EDUCATION

University of Maryland, Baltimore County (UMBC)

Graduated: May 2026

B.S. in Computer Science (Game Development Track), Minor in Music

Relevant Coursework: Data Structures & Computer Algorithms, Graphics for Games, Linear Algebra, Calculus I and II, Machine Learning and Artificial Intelligence, Software Engineering I, Database Management, Computer Networks, and Physics I and II

Involvement: UMBC Center for Women in Technology, UMBC Dog Collar Comedy, UMBC Residential Life, UMBC Game Development Club, UMBC Individualized Study Program

SKILLS

Developer Tools: Visual Studio, PyCharm, AWS, Github, Linux Commands, Yocto Build, JIRA, Unity, and Unreal Engine

Coding Languages: C, C#, C++, Python, JavaScript

Frameworks: HTML, CSS, React

Interpersonal: Collaboration, Public Speaking, Conflict Mediation, Leadership, Event and Project Planning, Mentorship

Technical: Canva, Microsoft Office (Word, Excel, Powerpoint), Adobe Creative Cloud

Spoken Languages: English, Spanish

RELEVANT PROJECT EXPERIENCE (FURTHER PROJECTS CAN BE PROVIDED UPON REQUEST)

“Mouse House”- Unity Based First Person Game

January 2026 - Present

Professor- Prof. Eric Jordon

- Game Producer/Programmer/Lead- Developed gameplay mechanics in Unity using C#, implementing enemy interactions, player health systems, and radial threat behaviors within a first-person exploration environment.
- Collaborated in a team-based game development project, contributing to gameplay systems, environment design, and debugging while coordinating with programmers and artists to deliver a functional prototype

Procedural Dungeon Level Generator- Independent Study

September 2025 - Dec. 2025

Research Intern, Mentor - Marc Olano

- Developed a procedural dungeon generation game system that dynamically creates varied dungeon maze layouts for a first-person dungeon crawler game.
- Utilizing Unreal Engine's C++ Scripts to implement algorithms for procedural level generation and design

“Retriever Routes” - Software Engineering Course Project

January 2025 - May 2025

- Collaborated in the full software development of an on-campus navigation app using VS code using HTML and JS tools and implementing Google Maps API In collaboration with Leaflet routing system to create live tracking mapping experience for users
- Acted as SCRUM Master and Team developer managing a group of 4 individuals while acting as team programmer and UI/UX developer

WORK EXPERIENCE

SECO USA: Software Engineer Intern

March 2026-Present

- Developed internal tools and automation solutions to support IT operations, cybersecurity initiatives, and compliance efforts, improving efficiency across engineering workflows.

UMBC CO-Lab : Digital Intern

June 2024 - July 2024

- Worked in a cross-disciplinary and multi-lingual team to blend storytelling and diverse perspectives with technology, focusing on accessibility and user experience and immersive digital design.

UMBC Individualized Study: Website Development Student Mentor

September 2024 - May 2026

- Mentored students in website development in creating their capstone websites through UI development.
- Managed and created all content for the program's social media platforms, growing engagement to over 140% using content design and scheduling with Canva's Design Tools.

CERTIFICATES AND AWARDS

UDEMY: UNREAL C++ ENGINE COURSE

April 2026

WOMEN IN GAMES AMBASSADOR

Jan. 2026

UMBC Dean's List

September 2022-2024
